1. The following is an examiner's statement of reasons for allowance: The closest prior art is Feher et al(J. Organometallic chemistry, 1989), which teach structurally similar compounds as claimed herein, see for example pages 37-39. However, none of the compounds are among claimed herein. Inasmuch as aminophenyl octakis compounds are novel, the preparation of those compounds are novel too. In re Ochiai, 37 USPQ2d 1127. With respect to claims 38-39, applicants are using fly ash or rice ash hull as the source of preparation, a cheap source. Thus starting material appears to be unusual and hence process claims are patentable too.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
